U A TODAY

A BRIEFING

OVERT SPYING
Concerning my declaration (My Declaration (tabloid).pdf https://drive.google.com/file/d/1tTvV-B4wfT4R7PI_pSuuCIjag5TeHT-i/view?usp=drivesdk md5sum 201cc1e31692281d8597eed259be8540) I can explain much further in detail the technical happenings behind the overt spying: (My Declaration) For overt spying live video cameras spread everywhere, telephone communications recorded, monitored, interrupted, and disconnected during calls. Infringing the ability of communication., and economic fraud of the US telecom industry which amounts to having no safe modus of communication. An alternative is a walkie talkie but even these from the shelf are garbage with what in affect becomes spy microchips. The only resort is a handcrafted radio such as a CB but without any other endpoint I find it a useless endeavor.

EMERGENCY COMMUNICATIONS About the technical details it appears that the multimillion dollar telecom industry [citation In 2021, the mobile industry contributed 4.5 trillion U.S. dollars to global GDP https://www.statista.com/statistics/1100651/worldwide-mobile-industry-contribution-gdp/] in the US Mexico and Canada has been moved to what is called VOIP and creates a latency which is highly useful for spying and lying and voice identity theft. A quick way to test is to use a phone recorder if it were a real telephone the recorder works but for these crook software phone lines it does not work. I can go on and on about the details of how crooked the multi-trillion dollar telecom has become. An example is roaming when there was corporate responsibility which comes along with ownership there were roaming charges now it is all seamless like a communist system and for the most part is the brands have little meaning anymore it seems they have all been put into a communist VOIP system and in the US this is the only choice.
Moon bounce, EME, for EMERGENCY COMMUNICATIONS PROTOCOL. About half the time during moon rise Morse code may be used over a hemisphere.

POLITICAL WINDS
Only a third of Americans are satisfied with the current form of government. (https://globalcommandcenter.blogspot.com/2022/07/surveys-show-that-people-have-very.html)
Black lives matter supports taking down Robert E Lee bronze statue and other

confederate monuments it supposes to be white supremacist. [Deu 27:17] This is an important consideration for Congress of America.

JOURNAL OF CONGRESS OF AMERICA

I have begun Congress of America and journaled expect a published journal in September.

UPDATE: 2022 Congress in recess unresolved.(JCOA at Coldwater Commonwealth, Heartland Providence on the nineteenth day of August in the Two hundred forty fivth https://docs.google.com/document/d/1nEGmx2w-1vqAw9OO94m_tVz9FA3w7AORLs7Y0o347S4/edit?usp=drivesdk)

CURRENT EVENTS

The most recent news is that the White House was under attack by Americans who raised a confederate flag in the white house including a military veteran being killed (Ashli Babbitt[1]).

There was a large coronavirus policy reaching worldwide and now continues and during such news that an Army gathered at Washington D.C. the capitol to defend the White House while inaugurating Joe Biden as president however the size of Army gathered suggests a mobilization of troops in magnitude much higher than was needed to gun down a veteran.

UPDATE: 2022 It looks like Joe Biden's amassing of troops on the homeland was a response to disarm American Militia in the ranks of an Honor Society called Oath Keepers. Gathering from CNN reporting nine Oath Keepers captured and charged with sedition: (CNN) Oath Keeper members brought explosives to DC area around January 6 and had a 'death list,' prosecutors say. <PHOTO A group of men, some of whom are wearing "Oath Keepers" insignia, gathers as rioters storm the US Capitol in Washington on January 6, 2021.> The Justice Department released new details Friday evening of the alleged extensive planning by the Oath Keepers. - that prosecutors intend to use against the Oath Keepers during their trial in September. By Hannah Rabinowitz and Holmes Lybrand, CNN Updated 10:42 PM ET, Fri July 8, 2022 https://www.cnn.com/2022/07/08/politics/oath-keepers-explosives-death-list-january-6/index.html

BUSINESS USELESS

President of a U.S. Donald Trump revealed business is useless. Both America & England (UK) could not produce a respirator for coronavirus outbreaks. (or ventilator, a closed air circulation breathing device). no help from business. If business is this useless such that it cannot produce a life saving product when it is needed what purpose does it serve anything it can't be used for nuclear fusion generators. This is another economic example of where the military industrial complex is shrouded as private business but that it is more communist than business meaning it can never produce except that it was directly funded by government generated funding but worse than communism a communism called a private business so it is a step removed from the government making it

independent but by funding communist therefore better described as a slave owner 30% of the GDP yet a business could not supply a single machine to save a life of a coronavirus infected dying slave on whose back is bearn the weight of the communist funding yet all the while he is told and believes he is free none are more hopelessly enslaved than those who falsely believe they are free, the worse slavery and the worse communism coupled together. USA today is strikingly like bondage in biblical egypt. Striking parallels for Interpolated Mosaic law.

GLOBAL THERMONUCLEAR WAR

About the so called USA as it is today, recently Pres. Donald Trump withdrew from a nucleure non-aggression pact NAP (Intermediate-Range Nuclear Forces Treaty… Moscow…violating since 2014…raises concerns about a renewed arms race… with the 1987 agreement… (CNN www.cnn.com/2019/01/31/politics/us-mike-pompeo-inf-withdrawal/index.html) note for the editor this entry is to be replaced or supplemented by an encyclopedic reference) with Russia concerning a European territory. This seemed to be frowned upon because though the pact is not valid because of Russia ignoring it there was some suggestion it had a strategic edge. I'm at DEFCON 1. (I'm at DEFCON 1 https://globalcommandcenter.blogspot.com/2022/07/what-defcon-level-are-we-in-now.html)

Apparently there are more treaties ended about such time positioning for global thermonuclear war. (more: Open Skies https://en.wikipedia.org/wiki/Treaty_on_Open_Skies?wprov=sfla1)

ENERGY

Department of energy fusion power program archived apparently not active online anymore, but after a U.S. program pulled from online another France holding an Int'l fusion power program appears to be a PR stunt. (www.iter.org ITER is the world's largest fusion experiment. Thirty-five nations are collaborating to build and operate the ITER Tokamak, the most complex machine ever …)

AMERICAN HISTORY

When reviewing the founding documents called The Charters of Freedom I have to seriously question the validity of USA today. Having gathered the intent of the founders I must question the validity of USA today. USA today is said to have fifty states however I can only gather fourteen as valid. I can only gather fourteen states as valid because aside from the thirteen originating states Texas is the only state which applied for Union the other states were either annexed, installed or conquered in War. These methods are not valid to the constitution and certainly not the revolutionary intent of Natural Freedom. Going over why these methods are not valid first Annexation. Annexation is when there is some government in place then it is taken over by another for example parts of the louisiana Purchase had governments in place and after purchase they were annexed as states of the union this is not fully valid because there was no consent of the governed for application

into the Union. Consent of the governed is the basis for the revolution and entire American government. In some case the governments did give consent for Union making some of the annexed states possibly valid. Next the installation of states where a state is installed people have not given any consent any doing so must be presuming consent which is dangerously going forth when taking into account the fundamental intent. If a people annexed were to begin to speak up and express that they never consented it is not orderly that a people should need to secede from the Union because they never consented to begin with there was a false presumption of consent which the State was built on. This is dangerous because it leads to what has been called "implied consent" which cannot ever be true "implied consent" is a euphemism for duress or the use of force which is the ill thought the founders were doing away with. The thought of "implied consent" is for all practical purposes the very evil which the founders shed blood in War to do away with. "implied consent" in every case means there has been no representation only presumption and in most cases under duress is the so called "consent" which is the subject of it, therefore not only is there no representation but there is no consent whatsoever and in the worst of these cases the so called consent is only apparent under the duress of life threatening force. Without representation this dangerously undermines the form of government which is integral in every aspect of the American union binding supremely on all the land is "guaranteed a republican form of government" public and represented (for all practical purposes a representative form of government must also be a republican form of government). Next is the conquering in War the first two wars of the USA were first the Civil war between the northern and the southern states which surmounted with an act of federalism ending slavery in the south. See My file [American History.Civil War.US-ASCII.123.680.83f2c6bc07e862f0388ec7c3e577122c.txt]. The next war was against the Mormons in what is now known as California which was Mexico before the settlement of Mormons. When looking at history Mormons may have been the most American people there ever was. Likely Mormons were more American than Americans. After the slaughter of its own people the United States went in to slay and conquer a nation of people which had been driven out in most part for being too American. Because the United States attacked the Mormons it pretty much condemns the United States to be an awefully disttasteful bad joke--the United States did all of the evils we complained of for it's revolution: slay your own people and install governments without representation. Anyhow such is how the land became to be known as having 50 states. It really needs to be examined is USA today valid, lawful? And if not? The fourteen still exist in union and perpetually the thirteen but this really leaves a facade of 50 states shrouding the USA. Anarchy Prevails.

I have found this even true by law for many years now the U.S. has been a false operation under a Constitution it nullified years ago leaving the Article of Confederation and perpetual Union a dead code. see my file [Journal of Congress of America]

This thing supposing to be the USA is all over but what government do I want on

my shoulder. My best hope is to enlarge religion which is what brought forth all my examinations the so attractive "Bill of Rights" I find to actually be all of which makes a first amendment and of which document is oh so attractive looks to be the last Act of America to have furthered the intent The Charters of Freedom charted. Including more direct representation which had not passed. After that America looks to have lost its course. My concern with government seems to stop with this, for it's good, last attractive Act. The Act of passing the Bill (of rights). For MySelf if there is anything desireable of the USA it is here The Charters of Freedom: the declaration the articles then Constitution and finally the bill of rights. I have for my interests to preserve authenticity begun a word count of these documents. The bill of rights the first of my concern and continuing to the precursors. Is there any way to reset the government on the charted course it left?--it's not so much about documents but intent: the intent they were made to convey. My editory note footer of My transcription of the Bill Of Rights:

"
This "Bill Of Rights" amendment to the Constitution of the United States was ratified December 15, 1791. Subsequent amendment complicate the intent of the Constitution.
"

notes subsequent bending of intent.

I find myself reviewing these documents over and over and for what? Of now these documents are necessary for a single line in My Living Will document titled: LIVING WILL, SOVEREIGN the line is as follows:

"
THESE INSTRUCTIONS EXPRESS MY LEGIT RIGHT TO REFUSE TREATMENT COOPERATVE THE LAWS OF "The United States Of America".
"

AUTHENTICITY

And further my reviews have been for authenticity. Now having finished the most of authenticity comparing my documents counting word for word and character for character. The first document of concern the bill of rights has 463 words in 4656 characters ten clauses each an English sentence ending with periods and separated by spaces including a space after the last period. To further the authenticity a machine checksum may be used but this is dependent on the file format or encoding used to store the data using the encoding in place for now suffices until the codec can be specified by name and machine source code to be saved along side of the corresponding machine checksums which depend on it. The word count does not authenticate fully whereas the machine checksums calculate the entirety of a document. Lastly an option to view the original documents with my own eyes and compare with what I have received.

What other option is there? Israel; but a true Israel of the LORD as shown in the bible. Reinstating the entire nation otherwise what government is there?--it's all false pretense.

MAXIMA

A maxim which can be gathered from my reviews is that the intent of documents is not always carried out by the practitioners.

JERUSALEM

After all of my reviewing of American documents which makes good practice. I'm going to drop my constraints to America and focus on Jerusalem. Carrying over all my practice in wordcount and so on for what is more passionate. see http://jerusalemsyndicate.blogspot.com

[1]Ashli Babbitt Born: 1985, Lakeside, CA Died: January 6, 2021, Washington, D.C. Education: El Capitan High School Spouse: Aaron Babbitt (m. 2019–2021), Timothy McEntee (m. 2005–2019)
